

Plugins & CSS

Learning Objectives

- **Implement** smooth scroll
- **Implement** an image carousel
- **Implement** a dropdown menu
- **Use** animate.css

Agenda

- Review
- Image Carousel
 - Owl Carousel
- Smooth Scroll
 - CSS Tricks
- Animate.css

Review

jQuery Plugins

What are they?

- Very similar to JavaScript libraries
 - They are someone else's code, designed to accomplish some purpose
 - A jQuery plugin extends what jQuery already has available

The process...

- Download all files (ideally into a vendor folder)
- Include all necessary CSS and JS
 - Make sure their JavaScript file is included after jQuery, but before your file
- Read the documentation
- Implement!

Every Plugin (and library) has a slightly different process of including it - read as much as possible before you start!

Owl Carousel

Smooth Scroll

Some other stuff!

Dropdown Menu

Animate.css
